

Barber shops specialising in hairstyling for men are no longer a rarity. Men also want to be stylish and groomed! With RefectoCil's sweat- and wash-resistant colours you can match the beard to the hair colour, counter any undesired red hue and cover grey and white hair.

Beard Styling

Service duration: 5 - 20 minutes

Durability of the result: 6 weeks

Amount of tint:

Mustache: 4 cm

Three-day beard: 6 cm

Long beard: half of the tube

Shelf life of the products:

RefectoCil colours: 12 months after opening

Oxidant Cream 3%: 12 months after opening

Colour types

Use No 1 Pure Black for intense black colours

Use No. 1.1 Graphite for cold & ash shades

Use No 3 Natural Brown for dark brown shades

Use No 3.1 Light Brown for gentle brown shades

1

Clean the beard thoroughly with the Micellar* Eye Makeup Remover.

2

Mix the required amount of the desired colour in a cosmetic dish. Use Oxidant cream 3% for colouring beards. Thanks to its creamy consistency, it is easier to spread in thick beard hair.

3

Apply the dye precisely and evenly with the hard RefectoCil Cosmetic Brush. While doing so, brush in and against the direction of hair growth.

4

After the application time, remove the colour residue with a moist cotton pad and clean the beard with a moist towel. Thoroughly clean the beard again with the RefectoCil Eye Make-up Remover to ensure all traces of dye have been removed and brush it thoroughly with an eyebrow brush.

5

For a long-lasting and wellgroomed result, finish by applying RefectoCil Styling Gel.
